In Universitas Negeri Medan, there are 6 assignments for each subjects to be accomplished in each semester, namely Routine Tasks, Critical Book Reviews, Critical Journal Reviews, Mini Research, Engineering Ideas and Projects. In doing all these tasks, of course, reading has important role. A good reading gives accurate data and information in accomplishing all tasks. To avoid a very boring reading and provide challenges, develop a good learning methods is a must. The aims of the study is to investigate how the recitation learning methods developed for the reading comprehension of the students. The data obtained through the observation, questionnaires, and interviews to know the competence of students in reading comprehension. Adopting research development method that refers to the development of model, this development research data is qualitative and quantitative data. The objective of this research is to develop recitation methods in online learning for reading comprehension skills of the students of English Literature Study Program in Universitas Negeri Medan. The results of this study are expected to be able to give contribution to the students who take Reading Subject and also to the lecturers who teach Reading Subject to be more efficient and effective in using appropriate learning methods in Reading Subject.

**Keywords:** Recitation Methods, Reading comprehension, Learning Model

## 1. Introduction

Learning is a process activity and a very basic element in education at all types and levels. This means that the success or failure of achieving educational goals is very dependent on the learning process of students, both in a formal environment and in an informal environment. Learning a language is one of the fields of knowledge that many people study. Language is a means of human communication in interacting in their social environment. When talking about language, it cannot be separated from learning 4 basic aspects of language, namely listening, speaking, reading and writing, where listening and reading are categorized as receptive abilities, speaking and writing as productive abilities.

One's thinking ability can be developed in various ways, one of which is reading. Reading is a critical and creative reading processing process that aims to understand a comprehensive understanding of the contents of the reading. Thus, the reader will assess the content, function, impact, and what is contained in the reading as a basis for thinking and reasoning. Reading involves psychological processes, sensory processes, perceptual processes, and developmental processes. Learning to read with a variety of texts can increase
