INTRODUCTION
Since January 2020, COVID-19 has tainted more than 2,245,872 individuals around the world. More than 152,000 individuals have been affirmed to have kicked the bucket from this infection. In this manner, it isn’t shocking that government pioneers in numerous countries are battling out of the COVID-19 episode with their claim approaches. In China, for illustration, the government has reacted to the Covid-19 episode by giving uncommon wellbeing offices for coronavirus patients, turning sports lobbies, schools and inns into transitory healing centers, conducting rapid-test or polymerase chain reaction (PCR) on numerous inhabitants to execute the strategy of confining the city (lockdown). In Daegu, South Korea, early discovery through fast tests is carried out en masse with the point of localize individuals exposed to Covid-19 as a preventive degree to play down the spread of the crown infection, expel schools and campuses, additionally actualize lockdowns. This too applies to pioneers in Southeast Asian nations. One thing is for
