Abstract

This research aims to: (1) produce a suitable case method-based social problems textbook for class V at SD Negeri 056627 Kwala Sawit District. Batang Attack District. Langkat, (2) produce an effective social problems textbook based on the case method in class V of SD Negeri 056627 Kwala Sawit District. Batang Attack District, (3) Steps to become better textbook. In this research refers to the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) research and development model. The results of the research show that case method-based social problems textbooks are very suitable for use. This is proven by material experts with a percentage of 94%, language experts 90% and design experts 78%. The social problems textbook based on the case method is very effectively applied to improve student learning outcomes at SD Negeri 056627 Kwala Sawit Kec. Batang Attack District. Langkat, based on the completeness test, student learning outcomes were 91.66% (very good) and the n-gain score increased student learning outcomes by $g = 0.75$ (high)

Keyword: development, textbooks, case method

INTRODUCTION

Education is very important, because education is a chosen effort to influence and help children improve their knowledge, morals and physical abilities. Gradually, it can lead children to achieve their highest dreams. In general, we know that education is a universal activity in human life, therefore education is very important and a right for everyone. Every human being has the right to receive and hopes to always develop in education, because through education it will create people who are potential, creative, and have brilliant ideas as provisions for a good future.

Achieving educational goals is greatly influenced by the success of learning activities at school, because Studying and Educating are the core of the educational process. There must be good interaction between teachers and student learning resources to support the achievement of learning objectives. Teachers as learning managers must be able to provide active and enjoyable learning so that students can participate in learning with enthusiasm, and the material taught can be accepted by students easily. A good teaching and learning process can be realized, of course influenced by a teacher who must have good skills in using appropriate learning models for students.

Social problems material is material that contains problems happening in the around environment. With a case basis, students are presented with problems in the surrounding environment so that students are required to be active in solving problems that have been provided by the teacher. This material was taken because many social problems arise but students do not know the causes, consequences, or even how to solve these social problems. It is very important to provide social problems material to elementary school students so that
