Factors Related to The Incident of Early Marriage Among Adolescent Women in Mandailing Natal District Year 2022

Nirma Juli Saputri¹, Fazidah A. Siregar², Heru Santosa³

ABSTRACT

Early marriages are marriages happened by women in less from 20 years old. In North Sumatra, the earliest marriages are in Mandailing Natal Regency at 22.70 percent, followed by North Labuhan Batu 21.73 percent and Deli Serdang and Langkat 20.27 percent. The participation of school age children who are not in school aged 16-18 years, Mandailing Natal is in fourth place in North Sumatra with a proportion of 27.3 percent, which is in line with the percentage of female reproductive couples aged under 19 years, where Mandailing Natal is 18.95 percent due to the trend of early marriage due to school dropout (DO). The research is to analyze how incidence of early marriage bring over in Mandailing Natal Regency in 2022. The research design is cross sectional with a sample size of 95 people consisting of 44 married early and 51 not married early. It also was carried out using univariate and bivariate analysis using the chi square test. Of the five significant variables found that influence the incidence of early marriage, namely level of knowledge ($p=0.024$), attitude ($p=0.030$), belief ($p=0.036$), parenting style ($p=0.001$), role of peers ($p=0.028$). It is hoped that there is a need to provide education to teenagers regarding the impact of early marriage on reproductive health and education to parents to provide an approach to children from an early age and provide an understanding of marriage, the problems that will arise when married and change the habit that states that those married after 20 years are considered spinsters.

Keywords: Early Marriage, Parenting Style

INTODUCATION

The practice of early marriage continues to decline in various countries in the world, during the last decade it is estimated that as many as 25 million early marriages could have been prevented through various effective efforts. However, there are still around 650 million women who get married before their 18th birthday. The largest numbers are in South Asian countries followed by Sub-Saharan Africa (Central Statistics Agency, 2020).

WHO 2021 said that women who were married for the first time before the age of 18 according to regions in the world was highest in South Asia with a proportion of 47 percent, while in East Asia and the Pacific it was 13 percent, West and Central Africa was nine percent, East and Southern Africa nine percent, Eastern Europe and Central Asia five percent, Middle East and North Africa four percent and other regions three percent (World Health Organization, 2021).

UNFPA data in 2019, 35.4 percent of women married under the age of 18 in Laos, 17 percent in Indonesia and 11 percent in Vietnam and on average in Southeast Asia women gave birth at the age of 15-19 years. in Southeast Asia, 47 births per 1,000, this figure is higher than South Asia with an average of 35 births per 1,000 (United Nations Population Fund, 2019).

Early marriage often occurs in some spaces in Indonesia, both in urban and rural areas. UNICEF in 2018, the prevalence of women aged 20-24 years in rural areas who married before the age of
